## EXPERIENCE

### HCLTech

AI Researcher

Jun 2023 – Present

Ho Chi Minh, Vietnam

- Developed and fine-tuned domain-specific Large Language Models (LLMs) for automation software testing at ANZ bank
- Designed and developed a retrieval-augmented generation(RAG) chatbot, integrated with tools and domain knowledge
- Researched and applied cutting-edge LLM techniques, including finetuning, RLHF, optimization, RAG techniques, knowledge graph integration, prompt engineering, planning and reasoning, multi-agent system, code generation.

### Infinigr

Machine Learning Engineer

Aug. 2018 – Apr 2023

Ho Chi Minh, Vietnam

- Developed and optimized tree-based models for fintech applications such as credit scoring, fraud detection
- Designed and developed NLP models for tasks like text classification, sentiment analysis, NER, and speech to text
- Built vision models for tasks such as object detection, segmentation, action recognition, and depth estimation
- Implemented end-to-end ML pipelines, data preprocessing, model training and deployment using cloud platforms

### Global Outsource Solution

Technical Lead

Mar 2015 – Mar 2017

Ho Chi Minh, Vietnam

- Designed and developed architecture of complex systems, ensuring scalability, performance, and maintainability
- Led a cross-functional team of software engineers and designers. Applied CI/CD and software best practices for team

### Global CyberSoft - Forix

Software Engineer

Sep 2008 – Mar 2014

Ho Chi Minh, Vietnam

- Designed and developed web applications using PHP frameworks: Zend, Laravel, Magento, Drupal, WordPress
- Implemented back-end APIs for mobile and web applications in domains: e-commerce, social media, data-warehouse

## TECHNICAL SKILLS

**Languages:** Python, PHP, JavaScript, Java

**AI Tools:** TensorFlow, PyTorch, Scikit-learn, Hugging Face, Pandas, Numpy, Matplotlib, OpenCV, NLTK

**ML Algorithms:** Regression, Classification, Tree-based Models, CNN, RNN, Transformers, LLMs

**Frameworks:** FastAPI, Spring, Flask, Laravel, React, NodeJS, Angular, VueJS, jQuery, Magento, WordPress

**Databases:** MySQL, PostgreSQL, MongoDB, Redis and **Big Data:** Apache Kafka, Flink, Spark

**Tools:** VS Code, Jupyter Notebooks, Git, Docker, Kubernetes, AWS, GCP

## EDUCATION

### University of Information Technology

Master's Degree in Computer Science

Ho Chi Minh, Vietnam

2020 – 2023

- Research assistant at MMLab. Topics: 3D vision, deep generative models, NLP, Large Language Models (LLMs)

### Japan Advanced Institute of Science and Technology (JAIST)

Research Assistant under supervision of Prof. Kazuhiro Ogata. Topic: Theorem Proving

Ishikawa, Japan

Jan-Mar 2020

### Kookmin University

Research Assistant under supervision of Prof. Young Kim. Topic: Security with SELinux

Seoul, Korea

2011 – 2012

### University of Science

Bachelor's Degree in Computer Science

Ho Chi Minh, Vietnam

2004 – 2008

## ACHIEVEMENTS

Certificates: Tensorflow Developer [Certificate](#) — [Coursera](#): Machine Learning, Data Science, Vision, NLP — IELTS 6.5

Publication: Efficient Finetuning Large Language Models For Vietnamese Chatbot (first author) [MAPR](#) 2023

## RECENT PROJECTS

**EnsayoRAG** | *Llama3, LangGraph, RAG, multimodal, vLLM, langfuse, promptfoo, deepeval, pgvector, FastAPI*

- Multi-agent chatbot system. Applied advanced RAG techniques, knowledge graph, multimodal, tool-integrated

**EnsayoTest** | *Python, Pytorch, OpenAI, Mistral, LangChain, AWS Sagemaker, Transformer, LoRA, RLHF*

- Leveraged open-LLMs and applied domain-adaptive finetuning to build Gen-AI powered tool for software testing

**Customer Support Assistant** | *Python, audio processing, wav2vec, Kaldi, RASA, nltk, BERT, LSTM*

- Developed speech recognition models for call center and rule-based chatbot for customer support assistant
